About the Company

Furniture Vision, an idea that started from the passion for aesthetics and technology of two visionaries, father and son, an idea that has taken shape in the field of furniture and interior design since 2007. Since then and until now the vision of the two has gone further and developed. At this moment, Furniture Vision has a factory with technology that is always upgraded according to market requirements and a tailor-made creative workshop.

Our Mission and Vision

Furniture Vision offers clients a dedicated project team comprised of professional managers, architects, and designers who serve as coordinators throughout the project planning and management process. Whether it's for residential or commercial purposes (such as shops, medical clinics, beauty salons, spas, hotel furniture, or office buildings), our team collaborates closely with clients to identify optimal solutions.

Every project is treated with utmost importance, with our team maintaining constant communication with clients to ensure a tailored experience that prioritizes arrangement, operational functionality, production efficiency, and timely delivery—all while aiming to minimize costs without compromising quality.

Our project managers meticulously oversee every aspect of the project, from 3D design and material selection to cost estimation and scheduling, ensuring seamless execution.

Our Milestones

2013

Furniture Vision
was founded

2015

we have successfully
executed one of Europe's
most ambitious Corian
projects - a 100-meter-
long, 3.5-meter-high wall
for Therme, Europe's
largest spa,

2018

the year we
witnessed
our biggest
technological
modernization and
upgrades, alongside
our expansion into a
larger production
hall

2023

our most successful
year to date, both
financially and in
terms of project
complexity and
quantity.
