Furniture Vision
more than furniture

Company description

Furniture Vision, an idea that started from the passion for aesthetics and technology of two visionaries, father and son, an idea that has taken shape in the field of furniture and interior design since 2007. Since then and until now the vision of the two has gone further and developed. At this moment, **Furniture Vision** has a factory with technology that is always upgraded according to market requirements and a tailor-made creative workshop.

The **Furniture Vision** factory has several divisions, among which the one for processing wood materials, those in composite and the professional painting section. From complex and well-known projects, such as those made for One United Properties, Therme Bucharest, soul projects in collaboration with Daruieste Viata (Louis Timisoara Emergency Clinical Hospital, oncology department and Children's Hospital in Brasov, pediatric oncology department), daring like those from Afi Palace Cotroceni (food court area), sophisticated as the salons from Gett's or Nepi Rockcastle, brave as those from Medlife, to complete home improvement projects, **Furniture Vision** has always managed to give life to the vision of those who they believed in us. Besides all the qualities of our team and the equipment we have, we mostly rely on the openness that characterizes us and the ability to turn any idea into reality.

total number of employees: 64

The factory

Our factory, located in Bucharest on Splaiul Unirii 313, is equipped with last generation equipment and has a production area of approximately 2500sqm.

The Furniture Vision factory has several divisions and professional equipment specialized in each technological process.

We have recently added indoor and outdoor advertising production to our portfolio of services. Whether it's volumetric letters from various materials or light boxes, all works are equally important, all customers enjoying the same attention. We always work with passion and pleasure because every successful work brings us forward.

Furniture Vision
more than furniture

We have completed one of the most ambitious Corian projects in Europe, a wall about 100m long and 3.5m high at the largest spa in Europe, Therme, launched in late 2015.

Furniture Vision is a member of the DuPont Quality Network.

The interest for the quality of the products and services we offer to our clients determined us to implement and maintain an ISO 9001 quality management system, ISO 14001 environmental management system and OHSAS 18001 occupational health and safety management system.

Furniture Vision provides its clients with its own project team, professional managers, architects, designers - coordinators in project planning and management. Whether it is a residential project or commercial furniture (shops, medical clinics, beauty salons, spas, hotel furniture, office building furniture), our team will work with you to find the best solution.

Our team treats each project with equal importance, constantly communicating with the client to offer a unique experience of arrangement, functionality in operation, simplification of production and assembly, finally aiming to reduce total costs and time so that the final product to have a high level of quality and also to be delivered on time.

Our project managers will carefully follow every detail of the work, dealing with 3D design, choice of materials, estimating and streamlining costs and scheduling.

Starting 2023, we are FSC certified

We respect the environment and aim to minimize the impact of our business on the environment. In addition to the fact that we want the greatest possible efficiency in all our activities we emphasize protecting the environment and minimizing the ecological impact of our business. The interest for the environment and at the same time for the quality of the products and services we offer to customers, led us to implement and maintain an ISO 9001 quality management system, ISO 14001 environmental management system and health management system and occupational safety OHSAS 18001.

FSC (Forest Stewardship Council) is an independent, non-governmental organization and non-profit established in 1993 with the aim of promoting responsible forest management in forests around the world. This organization offers services through the international FSC center in Bonn, Germany, but also through an international network.

Through FSC certification, companies involved in the manufacture of finished or semi-finished wood products avoid a series of situations, such as trade in illegally exploited wood, trade in wood exploited from plantations grown on the surface of former forests or trade in wood whose exploitation led to violation of civil and traditional rights. In other words, the standard allows entrepreneurs to reduce the risk of purchasing wood of unacceptable origin.

SPITALUL CLINIC DE URGENTA PENTRU COPII LOUIS TURCANU, TIMISOARA

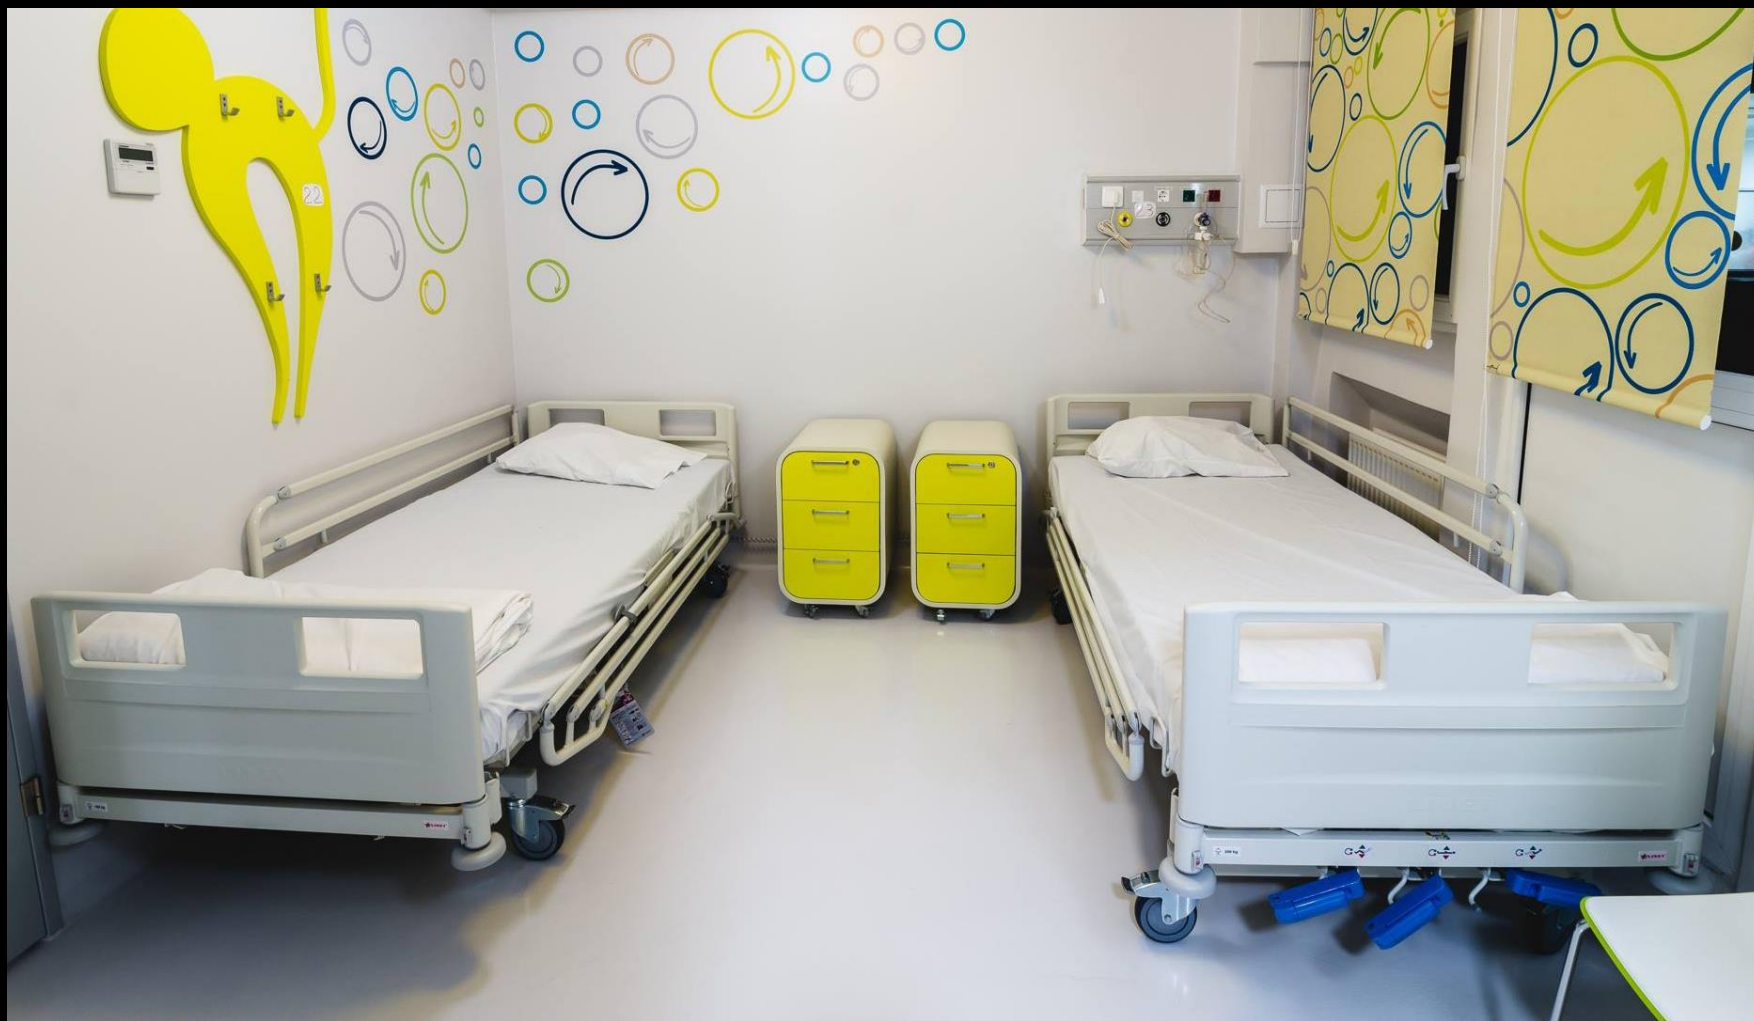

Cel mai emotionant proiect al nostru a fost cel de a aduce zambetul pe chipurile copiilor de la Spitalul clinic de urgenta pentru copii Louis Turcanu din Timisoara si Spitalul clinic de copii din Brasov.

Proiectele noastre de suflet ne ajuta sa gasim si un alt sens activitatii noastre si sa intregim viziunea **Furniture Vision**.
